DISCORDANT STARS

GENERAL CLARIFICATIONS

Any game effect which would "allow" a player to resolve an effect is optional as to that player.

If an effect would allow a unit with a unit ability to "gain" that same unit ability, that unit's owner may choose to use either the original or gained unit ability, but not both.

SHIPWRIGHTS OF AXIS

Industry Secrets only modifies the use of PRODUCTION that satisfies its trigger condition.

BENTOR CONGLOMERATE

Encryption Key confers exactly 1 technology specialty of any color; this acts as a wildcard technology specialty.

EDYN MANDATE

Rune Bearer mechs make their system a Sigil anomaly; this effect does not stack within the same system.

Decree and *Radiance* provide the effects of Sigils, not the anomalies themselves.

FREE SYSTEMS COMPACT

Cordo Haved may be used to resolve the ability of an exhausted legendary planet ability card.

GHEMINA RAIDERS

Jotun mechs and *Rule of Two* are not prevented from resolving by the presence of infantry or fighters.

GLEDGE UNION

Core tokens are not attachments, and only modify the printed values of a planet, which attachments may modify.

AUGURS OF ILYXUM

Oracle AI and *Probability Algorithms* do not interact with either outcome of the "Incentive Program" agenda.

BERSERKERS OF KJALENGARD

Star Dragons may retreat into anomalies, any units unable to retreat or be transported into the chosen system are removed from the game board.

KOLLECC SOCIETY

Cloaked Fleets resolves after ships are produced, meaning fleet supply limits apply before any ships are "cloaked.

LANEFIR REMNANTS

The Venerable – Resonance Cascade may only swap each relic in play a total of once.

LI-ZHO DYNASTY

Traps cannot be revealed or otherwise shown to other players outside of their listed timing.

Saboteurs is an optional component, for groups which prefer to have stronger *Traps*.

MIRVEDA PROTECTORATE

Assault Machina allows 1 of your units to use its SPACE CANNON against ships in adjacent systems; only 1 unit may benefit from this effect at any given time.

NIVYN STAR KINGS

Eradica removes units from the game board; these units are returned to their owner's reinforcements.

NOKAR SELLSHIPS

Hired Guns cannot move out of systems that contain the Nokar player's command tokens, but may move through systems that contain the Nokar player's ships, and retain their attributes, abilities, & ability text.

ROH`DHNA MECHATRONICS

B-Unit 205643a still requires placement of the spent token via the secondary ability; this token may be placed in any system without impacting the placement of structures.

VADEN BANKING CLANS

Collateralized Loans can be used once each time an opponent's ship is destroyed during combat.

Midas Turbine and *Vaden Handshake* grant 1 controlled ship 1 additional movement for each trade good spent, this effect may be used multiple times toward the same or different ship(s), provided enough trade goods are spent.

VELDYR SOVEREIGNTY

Branch Offices must attach to planets when received, if able, or they are returned to the Veldyr player.

Auberon Elyrin – Twilight Protocol allows the Veldyr player to gain their corresponding unit upgrade of a chosen technology's unit type.

Special thanks to andcat, Arinok, BradleySigma, BeepBeep, Berserker, Cacotopos, cows go moo, Griffy, Gwen, Haymaker, JaHeit, JattaPake, Joojkin, Leary, Mozco, PhilRoi, Raptor, Ruinsage, Scwiggles, Spage, unfulvio, uwsnycusa, Vorox, and Wekker for their time, effort, and other contributions toward making this a reality, as well as to everyone else who has otherwise supported us along the way.

Thank you all for your support, this would not exist without you.
